PORTFOLIO: mahmoudyosrimahmoud13.github.io

PROFILE

Detail-oriented Software Engineer specializing in cross-platform **Mobile Application Development** with Flutter and Machine Learning integration. Experienced in architecting applications using **Clean Architecture**, deploying on-device AI models, and implementing **Asynchronous Programming**. Committed to **Quality Assurance** through **TDD** to deliver seamless user experiences.

EDUCATION

Bachelor of Computer Science Sep 2020 – Jun 2024

Kafrelshikh University, Faculty of Computer Science and Information Technology *GPA: 2.9/4.0*

Relevant Coursework: Data Structures, Algorithms, Database Systems, Software Engineering, OOP

PROJECTS

inPace for Android (Learning Accountability App) | Project Link | Case Study 2026

- Built the **Flutter** Android app that runs the full Python app on the phone: **serious_python** starts a local server and **webview_flutter** shows it full screen, so desktop and phone share one codebase.
- Added the native pieces: Android file and folder pickers, the share sheet, inpace:// deep links (**app_links**), the back button, voice notes, full-screen video, and lock-screen alarms (**flutter_local_notifications**).
- Automated releases with **GitHub Actions**: a signed 64-bit APK is built and attached to every version (v1.14), next to the Windows, Mac and Linux apps.

CodeNote (Developer Productivity Suite) | Project Link | Case Study 2024 – 2026

- Released on **Android and Windows**, with an open-source, offline-only Community Edition (AGPL-3.0) built on the same **BLoC** core.
- Developed a productivity suite featuring a block-based editor with **Asynchronous** syntax highlighting for 20+ languages.
- Implemented **Real-time Chat** with cloud sync via Firestore and dual-notification systems (**FCM** and Local).
- Integrated **Google ML Kit (OCR)** and **TFLite** on the device, with **Hive** storage and **GetIt** dependency injection in a **Clean Architecture** setup.

Rubies (Multi-Shop Marketplace, Full Stack) | Case Study 2026

- Built a mobile-first, **Arabic RTL** marketplace with four apps in one (customer, shop, courier, admin) on **Next.js** and **FastAPI** / **PostgreSQL**, with QR handover at the door and **38 automated tests**.

Flutter Clean Architecture TDD Boilerplate | Project Link 2026

- Engineered a multi-layered Clean Architecture template with **Test-Driven Development (TDD)** and Domain-Driven Design (DDD) for scalable, maintainable code.

Health Hub (Medical Integration Platform) | Project Link 2024

- Developed a medical platform frontend connecting patients, doctors, and pharmacists, with **RESTful APIs** over **Dio** and **Cubit** state management following **SOLID principles**.

Smart Notes (AI Object Detection) | Project Link 2023 – 2024

- Deployed an **SSD MobileNet V2** model via TensorFlow Lite for real-time object detection in the camera feed, with **SQLite** storage and **Riverpod** state management.

TECHNICAL SKILLS

- **Languages:** Dart, Python, C++, C#, SQL, JavaScript, TypeScript
- **Frontend/Mobile: Flutter**, Clean Architecture, TDD, **Asynchronous Programming**, BLoC, Riverpod, Dio, FCM, WebView, Deep Links, Local Notifications
- **AI / ML:** TensorFlow, PyTorch, **TFLite (SSD MobileNet V2)**, **Google ML Kit**, ONNX Runtime, Scikit-Learn, Pandas, NumPy
- **Back End & Tools:** FastAPI, PostgreSQL, Git, GitHub Actions, Firebase (Firestore, Auth), Hive, SQLite, Postman

CERTIFICATIONS

- **Python for Data Analysis** | NTI Verification 2024
- **Deep Learning Specialization** | Coursera 2025 – 2026
- **Machine Learning Specialization** | Coursera Verification 2024
- **Huawei HCIA-AI Learning Course** | Huawei 2023
